

Hurricane Checklist

V-Alert

- Are all assets geotagged with critical data on a map?
- Do you have alerts in place to notify you severe weather may be affecting your assets?
- Are you able to reference historical data and satellite imagery to plan for future events?
- Do you have aerial imagery and damage proxy maps for virtual inspections?
- Does your team have a single-pane of glass dashboard to help plan and execute?

FieldTeam Tracker

- Do you have the ability to view the location of your team 24/7 in real time?
- Do you have automatic notifications when job sites or conditions change?
- Do you have the ability to integrate sensors to track important equipment?

Drive Tracker

- Do you have critical information about closures, traffic, and other road conditions?
- Do you have the ability to optimize routes to get to the scene as quickly as possible?
- Can you integrate routes with V-Alert and FieldTeam Tracker to have a birds-eye view of everything going on in the field?

LEVERAGE OUR TECHNOLOGY SUITE

Hurricane season is upon us.

Experts are forecasting that 2024 will be an above normal hurricane season with as many as 23 named storms, 10 - 12 of which are likely to become hurricanes.

When the next hurricane inevitably strikes, be prepared with our fully integrated suite of technology applications. Earthvisionz offers a suite of tools to **help you communicate in real-time, manage field teams, and optimize routes.** Together, this state-of-the-art technology allows you to make critical decisions with accurate data at your fingertips.

With a subscription to V-Alert, you and your team will **receive automated alerts whenever one of your assets is threatened.** You can also overlay before and after satellite imagery to assess the damage. Every floodplain in the U.S. is on the map so you can see which assets are at greatest risk of flooding.

Need to keep track of personnel and plan operations? Earthvisionz has you covered with FieldTeam Tracker and Drive Tracker. These applications allow you to monitor your fleet and **establish two-way communications with you team anywhere in the country** while choosing the most optimal routes for safe travel.

In the face of a hurricane or other natural disaster, be prepared with Earthvisionz's comprehensive suite of software applications.
